

Join Us! School Neighborhood Site Assessment

Safe Routes to School (SRTS), a partnership of the City of Healdsburg Public Works, the Sonoma County Bicycle Coalition, and the Sonoma County Transportation & Climate Authorities (SCTCA).

Fitch Mountain Campus & Healdsburg High

SAVE THE DATE!

Tuesday, April 15th, 2025 | 8:00am – 9:30am

WHAT: Site Assessment

The SRTS team, in partnership with your school administration, hosts a walk through the school neighborhood to identify locations and situations that are barriers and challenges for students and families walking and biking to/from the school, and to identify opportunities to enhance the safety and comfort of traveling to/from the school. Following the walk, the SRTS team hosts a mapping workshop to document your concerns which will help inform the types and locations of safety treatment solutions.

WHY: SRTS Plans

Input from the Site Assessment informs the preparation of your school's SRTS Plan. The Plan will include an Infrastructure Improvements Plan (IIP) - a set of roadway and/or sidewalk improvements to increase pedestrian/bicycle safety and calm driver vehicle speeds and behavior - as well as safety education/active transportation (e.g. walking, cycling) skills training resources. Examples of infrastructure recommendations may include crosswalks, speed humps, traffic circles, among others.

WHO: The School Community

We invite school and district administration and educators, parents, guardians, grandparents, caregivers, school volunteers, crossing guards, neighbors, local businesses, and non-school community members to participate in the Site Assessment.

WHERE: Fitch Mountain Campus

Meet the SRTS team at the Fitch Mountain Campus front entrance. The neighborhood walk will begin promptly at 8:10 am.
